

## WRAP AROUND CASES AND TRAY PACKER WA 335-L HIGH SPEED MODEL

High speed wrap around cartoning machine, operating with continuous motion design 'in line' version. It meets many different packaging requirements such as those required to pack cartons, trays and many other packaging solutions

Model for operating speeds up to 40 packs per minute.

|                   |  |
|-------------------|--|
| • Type of cartons | Square based type of packages and similar products from 500cc to 1500 cc                     |
| • Formats         | The machine wraps cases/trays in standard configurations and many other customized solutions |

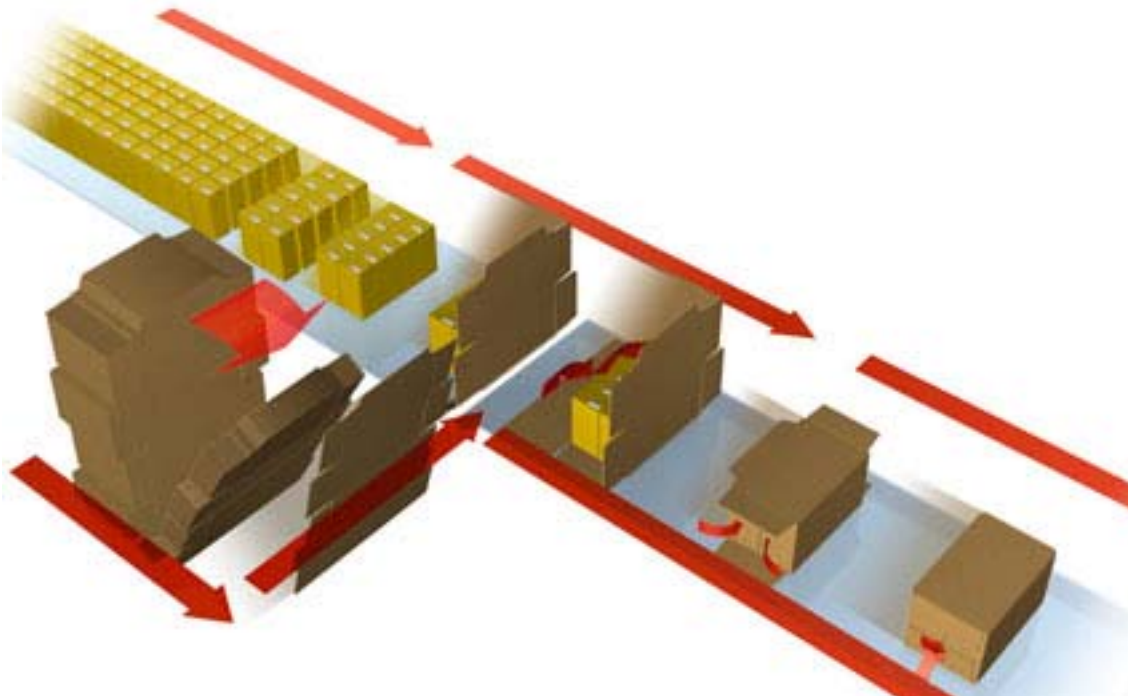

Machine specific for high speed production. It wraps the product (fed in-line)

The continuous working process whereby the trays are formed, filled and sealed in the course of the product passage guarantying compactness, safe product handling, smooth running and compact foot-print .

## WRAP AROUND CASES AND TRAY PACKER WA 335-L HIGH SPEED MODEL

operating principle:

- Product feeding
- Product grouping and separating
- Layer formation
- Blank feeding
- Layer/product feeding with blank side wall folding
- Wrapping
- Side flap gluing and closing
- Lid folding, gluing and closing
- Carton outfeed

## WRAP AROUND CASES AND TRAY PACKER WA 335-L HIGH SPEED MODEL

The working principle of the solution is uncomplicated. The products are collated and fed directly on to the blank which is fed in line as benefits the continuous motion cycle designed for high speed wrapping: the trays being formed, folded and glued during their passage; guaranteeing perfect product handling and stability.

A Large capacity Blank magazine with a low pressure feed system assuring long operating cycles.

## **WRAP AROUND CASES AND TRAY PACKER WA 335-L HIGH SPEED MODEL**

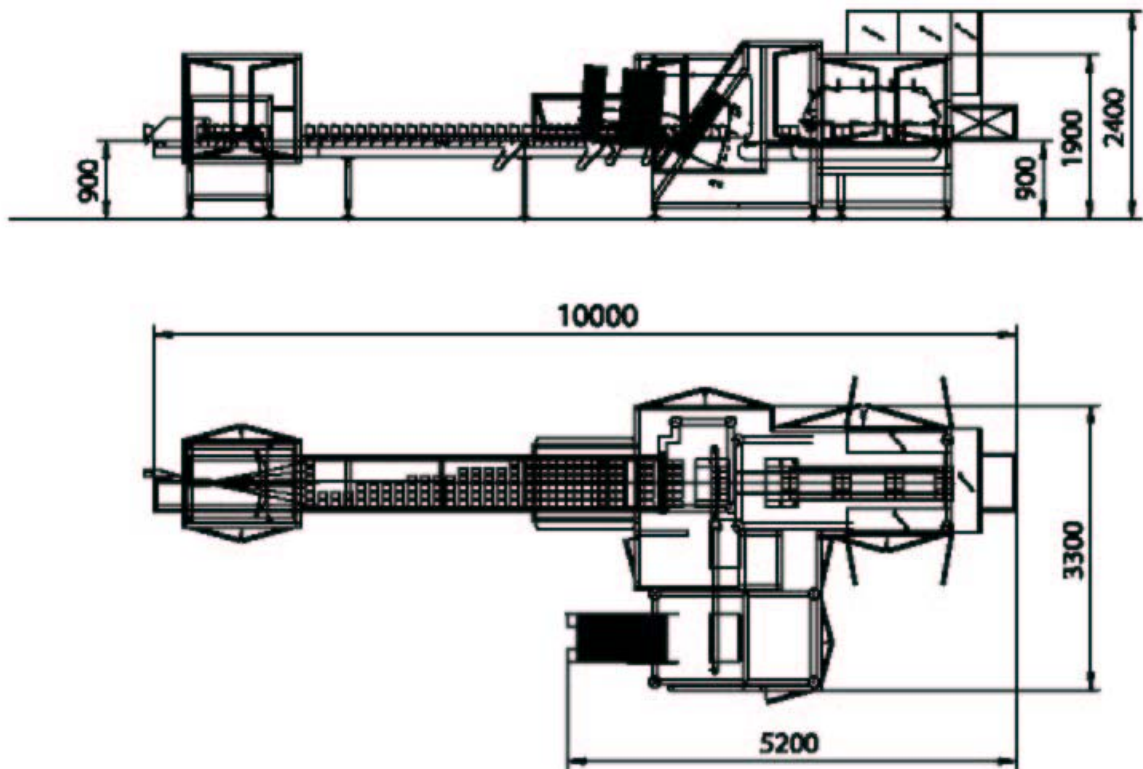

### **Machine characteristics**

- >>Ergonomic design which offers the maximum visibility of the working process and easy operator access
- >>Easy access graphics interface, text and eventual failures by " Touch Screen Panel " on swivelling support
- >>Latest generation of PC, with XP EMBEDDED operating system, controlling the operations and recording by removable "Compact Flash Card" hard disk . The PC can be equipped with an USB electronic hard disk device.
- >>The electronic system operate with low Electrical voltage of 24 v.
- >>Fast format changeover
- >>Automatic lubricating system
- >>Heavy duty construction :mainly built in stainless steel and designed for easy cleaning
